**FILTERED**

At Billi, we design and manufacture a range of energy efficient filtered water systems that offer our customers the very best in innovation, superior performance and reliability.

For more than 25 years, we have maintained a commitment to excellence and quality that is second to none. Our filtered water systems are preferred by Australian designers and architects for their elegant styling and space saving design.

Billi launched the world's first underbench boiling and chilled filtered water system in the early 1990s and was instantly recognised as the premium product of choice because of its high functionality, energy efficiency and space-saving design. From that first product, our range has grown to include a full complement of commercial and domestic systems now available throughout the world.

Today, we continue to innovate. Our designs keep pace with modern building techniques, contemporary interior concepts and changing lifestyle choices. And importantly, our products continue to incorporate improved eco-technology features.

Billi offers premium after sales care and product support, ensuring that our valued relationship with our customers does not end at purchase.

Billi is fully Australian-owned and Australian-made.

#### MODERN DESIGN

##### Stylish dispenser designs

Collaboration with architects, designers and consumers resulted in a range of sophisticated, stylish tapware that perfectly complements the style of its surroundings.

##### Range of finish options

Billi has a variety of finishes in its dispenser range including the popular chrome, brushed chrome, matte black and matte white with many more finishes available.

##### Range of site specific tapware

There is a range of tapware suited to specific applications, including a safety dispenser and XL levered dispenser with red & blue coloured levers and braille pads for vision impaired applications.

#### UNDERBENCH TECHNOLOGY

##### No cupboard ventilation required

Water-cooled systems do not require cupboard ventilation or a cooling fan and operate a lot quieter than air-cooled systems. Cupboard ventilation is recommended for air-cooled systems.

##### Space saving design

With a focus on space saving, Billi systems are often less than half the size of comparative products, allowing you to make the most of the valuable undercupboard area.

#### PREMIUM FILTRATION

Billi's range of premium filters are equipped with unique Fibredyne™ technology.

The Fibredyne™ technology is a three layered structure which provides superior water quality.

**SAFETY AND USER  
FUNCTIONALITY****Splash free technology**

Billi's Splash Free boiling water delivery varies the water flow, slowing momentarily to eliminate splashing as the water first enters the cup.

**Safety first**

The red lock icon demonstrates when the safety switch is activated. Simply touch the sensor switch to release the lock and activate the boiling water. It will revert to safety mode after a period of non use.

**Disability conscious design**

The standard XL dispenser complies with disabled access standards. XR dispenser is ideal for wheel chair disabilities with remote control dispenser activation.

**Tap swivel feature**

A unique swivel action allows you to swing the dispenser out of the way if you need more sink space.

**ENERGY SAVING****Recovery, recycling and saving**

Billi recovers the waste heat energy produced in the chilling process to preheat the boiling water, enabling our systems to achieve substantial energy savings.

**Time-switch modes**

An inbuilt 7 day time switch ensures the system is running only when it is needed, eliminating unnecessary out-of-hours power consumption. An energy saving stand-by mode can be selected to activate after a preset time of non use. The Billi will power down to conserve power.

**Cooling technology**

Billi is the only manufacturer to offer both water-cooled and air-cooled options. Water-cooled systems are the most energy efficient option and Billi's heat-exchange technology ensures water usage is absolutely minimal.

Billi's air-cooled option generates far less heat than traditional air-cooled systems.

There is no need to compromise your lifestyle to reduce your carbon footprint. Billi is renowned for its eco focus, ensuring our sustainable appliances go beyond water and energy saving. We aim for low environmental impact to enhance the enjoyment of your personal surroundings.

A total quality commitment makes a Billi system Australia's first choice in water appliances – stylish designs combined with impressive performance.

Chilling water creates waste heat energy. Billi's patented technology recovers and reuses energy to preheat the boiling water, thereby saving energy.

Effective water and energy saving initiatives help meet Green Building Design (GBD) objectives. Billi filtered water systems offer unique power consumption advantages:

- Thermodynamic heat-exchange technology recovers and reuses heat energy;
- High performance polyethylene insulation retains water temperature and saves energy.
- Stand-by mode conserves power during set non-use periods.

Billi lets you enjoy pure, clean water without costly environmental impact through achieving optimal water and energy savings.

\*On Eco, Quadra & Quadra Plus models only.

# Billi's Environmental Focus

## GreenTag Certification

Global GreenTag is one of the world's most robust, trusted and widely recognised ecolabels which independently assures that every product is fitness tested and certified under leading certification programs that use world's best scientific methods. They have earned the reputation and trust of thousands of buyers, hundreds of companies and numerous green building councils, certification bodies and governments around the world.

Billi complies with GreenTag International standard v.32 with Gold level certification on the Eco, Quadra and Quadra Plus models.

The assessments required to achieve the Gold level certification includes:

- ✓ Australian Made
  - Assembled in Australia from majority imported components
- ✓ Building/Product Synergy
  - Makes building & other systems more efficient
  - Multiple purpose product
- ✓ Corporate Social Responsibility
  - Building code of Australia compliant
  - Complies with Australian law
  - Fit for purpose certified
- ✓ Health & Ecotoxicity
  - Considered safe to use
- ✓ LCA
  - Life Cycle Analysis – Greenhouse Gas
    - 'Low carbon'
    - Carbon footprint available
- ✓ Life Cycle Analysis – Water
  - Highly water efficient

## Premium Filtration

Billi prides itself on offering world class water filtration products to the global market. Billi's filter range is tested to the strictest health standards and is certified by the globally recognised NSF public health & safety organisation which ensures the highest level of drinking water is available.

## Fibredyne™ filters

Billi's range of premium filters have been integrated with Pentair's unique Fibredyne™ technology. The Fibredyne™ technology has a three layered structure with each unique layer aiding in the water filtration process. The filter range provides superior water quality, consistent filter life and peace of mind.

## Key Fibredyne™ technology benefits

- Turbidity reduction and life
- Chemical taste and odour reduction
- Three layers remove cysts with a very low pressure (Unique to Pentair) drop (2-5 psi), submicron filter only
- Higher flow rate
- Scale reduction
- Advanced multi stage filtration

### SEDIMENTS

Filters out particles in the water

### CHEMICAL DISINFECTION

Removes chemicals such as chlorine, fuels, detergents, herbicides and pesticides

### MINERALS

Enables minerals to flow through the appliance without allowing scale build up

### CYSTS

Prevents the growth of micro-organisms such as giardia and cryptosporidiums (994002 ONLY)

## Multistage filtration

**Layer 1:**  
**Post Filtration layer:**  
Traps Carbon fines

**Layer 2: Cyst Layer:**  
Creates a Cyst barrier

**Filter Core:**

**Layer 3: Outer Media Layer:**

Provides Depth Sediment Filtration and Chemical Reduction.  
Uses powered vs. granule carbon which increases surface area for greater Chlorine reduction.  
Has low density for extremely low pressure drop and increased dirt holding capabilities.

**\$8 billion  
annual revenue**

**100 +  
manufacturing facilities**

**30,000  
employees**

**6  
continents**

## Billi and Pentair

The relationship between Billi and Pentair commenced in 2013. With 40 years of history in purification and filtration solutions, Pentair's global footprint boasts an extraordinary \$8 billion turnover, 100+ manufacturing plants and 30,000 employees.

Offering the highest quality products in water filtration solutions on a global scale, Pentair supports its product through NSF certification, the strictest standards in health and safety ensuring Billi offers the safe drinking water.

Pentair's capabilities backed by product quality and experience is why Billi chose and continues to work closely with Pentair as a key partner in water filtration supply.

## Standard filters vs Billi premium filters

**Standard**

**CONVENTIONAL CARBON FILTER**

Conventional filters are made up of granules and often held together with a resin, decreasing the surface area and therefore the quality of the filtration.

**Billi**

**FIBREDYNE™ CARBON FILTER**

Fibredyne™ technology is fibrous and matted together, increasing the surface area of the carbon meaning there is greater contact time and better quality filtration.

## Replacement filters

Periodic replacement of filters is necessary to maintain water quality. Genuine replacement Billi filters are available on online website and from your local approved supplier. Filters are also available to suit the needs of different water supply areas. Billi recommend premium submicron filtration for bad water quality areas.

## Easy change replacement filter

Replacing your filter cartridge is simple. Solid amber dispenser icons indicate when replacement is due. The swing change filter simply swings forward and slides off. Fitting the new filter is just as easy – simply slide the filter in and swing it back. The cartridge locks into place.

**BOILING****CHILLED**

### Eco & Quadra - Instant boiling and chilled filtered water system

Leading the Billi range, the Eco and Quadra boiling and chilled drinking water systems are space saving, energy efficient and elegant. The functional style is designed for high use and meets green building design principles – providing you with the ultimate in environmentally sensitive appliances.

Product Code	Model	Suggested no. of people	Boiling water delivery cups per hour	Chilled water delivery cups per hour	Power supply (amps)	Height mm	Width mm	Depth mm
901000LCH	Eco	up to 10	90	60	13	340	180	500
904010LCH	Quadra Compact*	up to 20	100	150	13	340	315	365
904020LCH	Quadra 420*	up to 25	120	175	13	340	315	465
904040LCH	Quadra 440*	up to 40	150	175	13	340	315	465
904060LCH	Quadra 460*	up to 60	180	175	13	340	315	465
904100LCH	Quadra 4100	up to 100	250	175	15	340	315	465
904180LCH	Quadra 4180	up to 180	350	175	20	340	315	465

Based on the initial number of cups of boiling water immediately available, drawn at one cup every 10 seconds. Consideration may be needed for usage patterns and draw-off methods. 1 cup = 170mL. When specifying Billi Quadra air-cooled models, change the 4 in the product code to 5 and insert AC after the model eg: 905040, Quadra 440AC.

For air-cooled units add 45mm to depth of above dimensions, does not apply to Eco.

\* Optional in air-cooled. Contact us for more information.

**BOILING****CHILLED****PLUS**

### Quadra Plus - Dual temp filtered water system plus mixer tap

Enjoy all the benefits of Billi's boiling and chilled system and more. Quadra Plus also features a separate sink mixer tap, complete with its own generous hot water supply allowing it to function as a hot water service for the mixer tap as well as providing boiling and chilled drinking water. Also available in gooseneck mixer tap option.

Product Code	Model	50° hot water capacity litres	50° hot water delivery litres per hour	Boiling water delivery cups per hour	Chilled water delivery cups per hour	Power supply (amps)	Height mm	Width mm	Depth mm
904025LPCH	Quadra Plus 5*	7	40	120	175	13	340	315	465
904065LPCH	Quadra Plus 9*	9	60	180	175	13	340	315	465
904105LPCH	Quadra Plus 15	15	85	250	175	15	340	315	465

Based on the initial number of cups of boiling water immediately available, drawn at one cup every 10 seconds. Consideration may be needed for usage patterns and draw-off methods. 1 cup = 170mL. When specifying Billi Quadra Plus air-cooled models, change the 4 in the product code to 5 and insert AC after the model eg: 905065, Quadra Plus 9AC. For air-cooled units add 45mm to depth of above dimensions.

\* Optional in air-cooled. Contact us for more information.

Billi Eco Underbench Unit

### Sahara - Instant boiling and still filtered water systems

As an alternative to boiling and chilled, the Sahara system dispenses boiling and an unlimited source of ambient filtered water.

Product Code	Model	No. of people	Boiling water delivery cups per hour	Still water delivery cups per hour	Power supply (amps)	Height mm	Width mm	Depth mm
943010LCH	Sahara 310	up to 10	90	unlimited	13	340	180	360
943020LCH	Sahara 320	up to 20	100	unlimited	13	340	180	460
943060LCH	Sahara 360	up to 60	180	unlimited	13	340	180	460
943120LCH	Sahara 3120	up to 120	250	unlimited	13	340	180	460

Based on the initial number of cups of boiling water immediately available, drawn at one cup every 10 seconds. Consideration may be needed for usage patterns and draw-off methods. 1 cup = 170ml.

### Sahara Plus - Instant boiling and still filtered water systems

An alternative to the Quadra Plus, Billi's Sahara Plus system dispenses boiling and ambient filtered water and supplies a separate sink mixer. With its under sink boiling water reserve, Sahara Plus is ideal for kitchens, lunchrooms or breakout areas. Also available in gooseneck mixer tap option.

Product Code	Model	50° hot water capacity litres	50° hot water delivery litres per hour	Boiling water delivery cups per hour	Still water delivery cups per hour	Power supply (amps)	Height mm	Width mm	Depth mm
943025LPCH	Sahara Plus 320	7	25	100	unlimited	13	340	180	460
943065LPCH	Sahara Plus 360	9	40	180	unlimited	13	340	180	460
943125LPCH	Sahara Plus 3120	15	65	250	unlimited	15	340	180	460

Based on the initial number of cups of boiling water immediately available, drawn at one cup every 10 seconds. Consideration may be needed for usage patterns and draw-off methods. 1 cup = 170ml. A reserve of boiling water is still available after hot water is fully drawn.

## Standard Warranty

All components of the drinking water systems are covered by a 24-month warranty. The washroom range is covered by a 12 month warranty.

## Commitment to Quality

A strong commitment to quality is as important to Billi as style, function and innovation. Recognising the importance of reliability to customers, all Billi water systems are manufactured to strict quality standards.

Every system is designed to provide the highest possible standards of efficiency and energy savings.

## Certifications

Every Billi drinking water appliance is manufactured under a certified quality control system. They have been tested and comply with all relevant standards. Billi Eco, Quadra, Quadra Plus, Sahara and Sahara Plus systems are tested to and comply with; Watermark licence Number 21525; AS3498.

Billi Alpine and Filter Tap systems are tested to and comply with; Watermark Licence Number 21882; ATS 5200:105.

All Billi systems are also tested to: AS/NZS 4020; AS1428 Accessibility Design Requirements; Billi is also ISO 9001 Certified Certificate Number QEC11627.

Billi Eco, Quadra and Quadra Plus products are certified Gold Level under Global GreenTag standards.

XL Chrome dispenser with matching 70mm riser and font
